

Kids Time

Our office operates on "kids time". This means that some of our patients may unpredictably need extra time to be made more comfortable and less apprehensive.

In addition, we see many children with complicated orthopedic issues who need immediate prolonged attention. As much as we try to stay on schedule, "kids time" will invariably cause some delays. Because

of this, we do apologize for running behind; however, you can be reassured that we are taking care of your child in the same kind and caring manner.

We thank you in advance for your understanding and cooperation.
